PROFESSIONAL SUMMARY

Computer Science engineer specialising in Artificial Intelligence with hands-on experience delivering full-stack web applications, AI-powered chatbots, computer-vision solutions and business automation for companies in Kuwait and India. Proven ability to take products from design through development to deployment, combining modern web technologies (React, Node.js, Flask, PostgreSQL) with practical machine learning and generative AI integration. Strong communicator and team player with an award-winning record of presenting technical work.

PROFESSIONAL EXPERIENCE

Full Stack Developer
Mar 2026 – Present

Al-Nassim Golden Group | Kuwait City, Kuwait

- Developing and maintaining a scalable e-commerce platform using modern full-stack web technologies (React, Node.js, PostgreSQL).
- Performing data analysis and product information management (PIM) to improve inventory accuracy and business insights.
- Building AI-assisted tools to automate product categorisation, content generation and workflow optimisation.
- Collaborating with stakeholders to improve website performance, user experience and operational efficiency.

Full Stack Developer (AI & Machine Learning)
Jun 2025 – Jan 2026

QB Tech Solutions | Kerala, India

- Developed enterprise web applications using React.js, Node.js and PostgreSQL, including a role-based task management platform for organisational workflows.
- Assisted in developing AI and computer-vision solutions: face recognition, ID-card detection, and intelligent attendance and access-management systems.
- Built AI-powered chatbot solutions and contributed to deployment and maintenance of scalable web applications.
- Contributed across the full software development lifecycle — system design, implementation, testing, deployment and technical support.

AI Intern
Jan 2025 – Mar 2025

Workcohol Solutions Pvt. Ltd. | Chennai, India

- Developed an AI-powered educational platform using Flask and Google Generative AI for personalised learning.
- Implemented intelligent document processing that generated question papers directly from user-uploaded study materials.
- Built AI modules for automated answer-key generation, response evaluation, feedback on incorrect answers and personalised revision notes.
- Applied prompt engineering and generative AI to deliver context-aware educational assistance through a web interface.

AI & Web Development Intern
May 2024 – Jul 2024

British Link Kuwait (BLK) | Kuwait City, Kuwait

- Developed a custom generative-AI chatbot to automate company queries and improve internal information access.
- Assisted in website development, updates and maintenance to enhance functionality and user experience.
- Gained hands-on experience integrating AI solutions into real-world business workflows while supporting the team on technical troubleshooting.

PROJECTS

Asthma Monitoring System (2026) Live Demo

- AI model for asthma risk prediction combining respiratory and environmental data streams, with a real-time alert system for early intervention. *(Python, ML, Flask, Hugging Face)*

AI Quiz Generator (2025) Live Demo

- Flask web app integrated with Google Generative AI to generate context-aware MCQs from user text, with instant results, explanations and personalised study material. *(Flask, Google GenAI, Python)*

Heart Condition Analyzer (CardioAI) (2025) Live Demo

- Multimodal AI healthcare system analysing ECG signals, heart sounds and clinical data to detect cardiovascular anomalies, assess risk and trigger emergency responses. *(Python, ML, Flask)*

AquaNutri — Nutritional Deficiency Detection & Fish Recommendation (2024) Live Demo

- Deep-learning platform that classifies health conditions from skin images and provides personalised dietary recommendations. *(Python, Computer Vision, Flask)*

Mental Health Chatbot (2024)

- Intelligent chatbot that identifies emotional patterns from user conversations, detects concerns and offers supportive, empathetic dialogue. *(NLP, Python, Hugging Face)*

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, Java, HTML5, CSS3
Frontend Development: React.js, responsive web design, UI development
Backend Development: Node.js, Flask, REST API development and integration
Databases: PostgreSQL, SQL, database design and optimisation
AI & Machine Learning: ML model development, NLP, computer vision, Hugging Face
Generative AI & LLMs: Google Generative AI, LangChain, chatbot development, prompt engineering
Tools & Platforms: Git/GitHub, Hugging Face Spaces, Vercel, Azure, AWS, Google Cloud, Linux

EDUCATION

B.Tech (Honours), Computer Science and Engineering — Artificial Intelligence **Dec 2021 – Jul 2025**
Karunya Institute of Technology and Sciences | Coimbatore, India
CGPA: 7.92 / 10

Higher Secondary Education (CBSE) **2019 – 2021**
Good Shepherd Public School & Junior College, Kerala, India | 86.4%

Secondary Education (CBSE) **2018 – 2019**
United Indian School, Kuwait | 83%

CERTIFICATIONS

- **Microsoft:** Azure Fundamentals ◇ Azure AI Fundamentals ◇ Security, Compliance & Identity Fundamentals
- **Google:** Data Analytics Professional ◇ Cybersecurity ◇ Cloud Computing Foundations (Infrastructure; Data, ML & AI)
- **AWS:** Cloud Essentials Training Badge
- **Cisco:** Ethical Hacker ◇ Python Essentials ◇ Introduction to Packet Tracer
- **Meta:** Android Developer Professional Certificate
- **IBM:** Getting Started with Enterprise-Grade AI

ACHIEVEMENTS

- Top 10 Finalist (Kerala–Tamil Nadu) — SSN iFound Startup Challenge
- Finalist — Smart India Hackathon (internal round)
- Head — Design Team, MindKraft Tech Fest

LANGUAGES

English — professional fluency (IELTS 7.5) ◇ Malayalam — native ◇ Tamil ◇ Hindi
